

2018-2019 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 8, Feb. 17th, 2019– Feb. 23rd, 2019)

Highlights

- In week 8 of 2019, all the individual local flu activity indicator values increased compared to the previous week. As a whole, flu intensity (composite indicator) continued to increase and is high.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, HIGH
- Local medical facility labs reported 3,200 tests run with 1,007 (31.5%) positive results for week 8 of 2019.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased compared to last week.
- In week 8 of 2019, trends for the majority of local over-the-counter medication category sales tracked increased (decrease in throat lozenge sales; increase in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever sales; stable in adult anti-fever sales) compared to last week.
- In the U.S., influenza activity remains elevated in the United States. Influenza A(H1N1)pdm09, influenza A(H3N2), and influenza B viruses continue to co-circulate. Please [visit the CDC website for specific information](#).

Local Flu Activity Dashboard *(All data are preliminary and may change as updated reports are received.)*

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 8, the preliminary Ohio¹ (statewide) influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (35.0 per 1,000 visits) increased compared to the previous week and is above its baseline average for the week (Figure 1). The week 8 percentage of all Emergency Department (ED) visits categorized as ILI increased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 8 of 2019, 5.0% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week eight.

Laboratory Surveillance

During week 8 of 2019, reporting Franklin County sentinel medical facility laboratories tested 3,200 specimens, with 1,007 (31.5%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 8 of 2019 is 36,618 with 3,725 (10.2%) positives (3,556 type A, 167 type B, 0 type A and B, 2 type unknown).

Nationally in week 8 of 2019, clinical laboratories reported 39,107 specimens tested for influenza viruses, 10,316 (26.4%) of which were positive (10,027 type A, 289 type B). Public health laboratories reported testing 1,915 specimens, 1,151 of which were positive (1,128 type A – of which 494 were A(H1N1)pdm09, 583 were H3N2, and 51 were not subtyped; 23 type B – of which 7 were Yamagata lineage, 7 were Victoria lineage, and 9 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 8 of 2019, Ohio clinical labs reported 48,666 specimens tested for influenza this season thus far. Positive results include: (240) A(H1N1)pdm09; (157) A/H3N2; (6,099) Flu A Not Subtyped, and (92) Flu B (through 2/23/2019). In week 8 of 2019, ODH Public Health Lab reported 725 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (382) A(H1N1)pdm09; (224) A/H3N2; (1) Influenza B (through 2/23/2019). Please visit the ODH website for more information.

ED Respiratory Visits

In the 8th week of 2019, the percentage of all ED visits categorized as respiratory increased compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 8 of 2019, trends for the majority of local over-the-counter medication category sales tracked increased (decrease in throat lozenge sales; increase in cough and cold, electrolyte, thermometer, chest rub, and pediatric anti-fever sales; stable adult anti-fever sales) compared to last week.
